

Release Notes

Climate Guard & Plus-X EM Built-In Module firmware version 1.1.0 Sensor Module firmware version 1.1.0

Scope

This document describes the changes in Climate Guard Built-In Module firmware from version 1.0.8 to version 1.1.0 and the changes in Sensor Module firmware from version 1.0.3 to version 1.1.0.

New Features and Enhancements

Support for enhanced Rev B Combination Humidity / Temperature sensors:

The new Rev B Humidity / Temperature Sensor for use with Climate Guard and Plus-X EM systems offers improved measurement accuracy of $\pm 0.5^{\circ}\text{C}$ from -10°C to 65°C . To make use of the new Rev B sensors, it is necessary to install firmware version 1.1.0 or higher in your system's Built-In Module and any installed Sensor (Analog) Modules.

Caution: Systems running Built-In Module and/or Sensor Module firmware version 1.1.0 will not operate properly with Rev A Humidity / Temperature Sensors. Be sure to upgrade all sensors to Rev B before installing firmware version 1.1.0.
