

# Release Notes

## PlusConnect™ GatesAir HPX firmware version 1.0.5

### Scope

This document describes the changes in PlusConnect GatesAir HPX firmware from version 1.0.3 to version 1.0.5.

### *Changes from version 1.0.4 to version 1.0.5*

#### New Features and Enhancements

##### **Loss of communication with the transmitter now results in an ARC Plus system alarm:**

When SNMP communication is lost between the PlusConnect GatesAir HPX and the transmitter, the controlling ARC Plus unit now issues a system alarm.

#### Resolved Issues

##### **Unauthorized SNMP communications are now ignored:**

The PlusConnect GatesAir HPX now rejects unauthorized SNMP Get Requests without interrupting the desired SNMP communication with the HPX transmitter.

### *Changes from version 1.0.3 to version 1.0.4*

#### Resolved Issues

##### **New MAC address range is now supported:**

A new range of MAC addresses has been accommodated for production of PlusConnect GatesAir HPX units. This change has no user impact.
