

Product Update

Software Version 3.2.14.9 is now available for AutoLoad Plus.

AutoLoad Plus can now be upgraded with new features and capabilities. Changes from software version 3.2.7 to 3.2.14.9 are highlighted below. Detailed descriptions of these changes can be found in the Release Notes document included in the software download package.

New Features and Enhancements

- Management of Lost Plus-X and Lost SNMP alarms has been enhanced.
- The ability to mute Lost ARC Plus alarms has been added.
- SNMP float opaque data type has been added to the SNMP channel dialog box.
- The configuration save process has been enhanced.
- .NET libraries have been updated.
- Support has been added for clearing the RSI vocabulary cache.

Resolved Issues

- The ARC Plus serial number now displays correctly in AutoLoad Plus.
- Link to the manual now resolves correctly.
- The Email templates dialog box now loads correctly.
- RSI custom speech files now load properly.
- AutoLoad Plus now limits site names to twelve characters.
- Invalid SNMP configurations are now cleaned from the ARC Plus configuration.
- The site name now saves properly after restoring a configuration.
- Restoring a configuration no longer overwrites authorization codes.

To install the new software, visit <https://www.burk.com/downloads>, select the AutoLoad Plus support page, download the software package and run the installer.
