

## Product Update

***AutoPilot® Version 4.2.4.6 is now available for download.***

---

AutoPilot software version 4.2.4.6 is now available. Changes from version 4.1.56 to 4.2.4.6 are highlighted below. Detailed descriptions of these changes can be found in the Release Notes document included in the AutoPilot software download package.

### **New Features and Enhancements**

- Alarm muting dialog has been enhanced to be more intuitive
- Enhancements made to reading and writing of AutoPilot user.config file
- Automatic backup and recovery for Jet Flowcharts running in AutoPilot
- Added support for Arcadia
- Added the ability to download all Captures available on an ARC Plus
- Reports can be configured to show high precision time stamps
- RTSP Video Custom View object now has a complete URL property
- Jet Active Flowcharts now support month and day of month conditionals
- AutoPilot now supports emails using SSL protocol
- The Default Views now have a toggle full screen context menu option
- Label border property added to Summary Status Indicator objects
- Clarified units where applicable on Custom View object properties

### **Resolved Issues**

- AutoPilot Jet Flowcharts conditionals properly compare floating point values
- Network devices now properly receive SNMP traps
- New alarm notification dialog box correctly displays the alarm count
- Jet Active Flowchart saves error properly on disconnected sites
- ARC Solo Jet Active Flowcharts can now be scheduled at intervals beyond 3 hours
- Custom View Map object properly displays all maps
- Duplicate event and alarm entries no longer appear in reports
- Previously cleared alarm timestamps are unaffected by the clear all command
- ARC Solo connections properly close after a timeout error
- The delete key no longer deletes an Action or Conditional block

- Jet Active Flowcharts can be properly scheduled beyond 1000 seconds
- Summary Group Status object LED resized
- The Custom View editor properly processes undo events
- The Edit Network buttons get disabled when not available
- Custom View chart data automatically updates in the background
- The 64-bit installer now installs to the proper directory
- Password command button prompt now masks the password
- Multi-paste function now preserves layer order
- AutoPilot now properly calculates last capture download time
- Custom View chart objects properly handle null database records
- The Logged Data view sorts data newest to oldest by default
- Custom View meter objects no longer auto assign the Visibility Channel Adapter property
- Custom View conversion utility properly converts SNMP object properties
- Warp Engine connections now monitor user alarm messages
- Additional exception handling added to ARC Plus Status Channel polling
- The “Edit ARC Plus Network” button is now enabled when a site is selected
- New ARC Plus networks retain public IP addresses
- Unmodified Jet Flowcharts no longer cause a change detected pop-up
- Reverted the change to nomenclature describing how a site is connected
